Environmental report Ahola Transport 2017

Ahola Transport plans and carries out transport assignments with an on-line concept, where the customer's freight is always the starting point for planning routes. This way, lead times can be shortened, freight handling is minimized and flexibility is increase

Background to Ahola Transport's Environmental Work

Ever since the middle of the 1990s, Ahola Transport has actively worked on improving its environmental profile. In 2000, a more purposeful environmental effort was begun in which third-party certification of the company's environmental system (according to ISO 14001) constituted a natural step. This goal was reached in 2002 when the company obtained its ISO 14001 environmental management certificate. Since 2001, the company has published an annual environmental report

where the goals and results of the environmental work are presented.

The rationale behind the active work on environmental improvement measures is founded in demands from customers and other interest parties, in an ever greater environmental awareness among the company's owners and co-workers as well as an increased insight into the connection between environment and economy within the transport industry.

The following tasks form the core of our environmental work:

- Constantly reducing our fuel consumption and our emissions in relation to the quantity of transported freight.
- Increasing our co-workers' insight into environmental issues.

Result for 2017

Training

Drivers

The detailed environmental goal with respect to the training of drivers in 2017 was that 90 % of the company's own drivers would have had training in fuel-efficient driving by the end of the year.

The result by the end of 2017 is that 90% of our own drivers have had training in fuel-efficient driving.

Other Staff

The goal for 2017 is that at least 95 % of the staff would have up-to-date environmental training.

In the annually reoccurring internal environmental training sessions, the following things i.a. are addressed

- Emissions that occur in lorry transports and their impact on the environment
- How one can, using an effective transport concept, reduce one's environmental impact
- Ahola Transport's environmental goals and key figures

For the moment, 65% of our support and administration staff have had actual environmental training.

Fuel saving

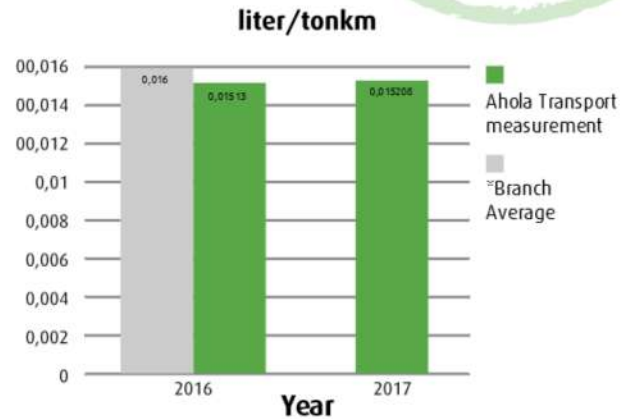

During 2017 Ahola Transport has made significant investments in vehicle computers, enabling more environmental friendly and safer transports. All new trucks are equipped with vehicle computers. The device helps and motivates to a more environmental friendly and safer driving.

Result of Fuel Consumption per Tonne kilometre

Result of Fuel Consumption per Tonne kilometre

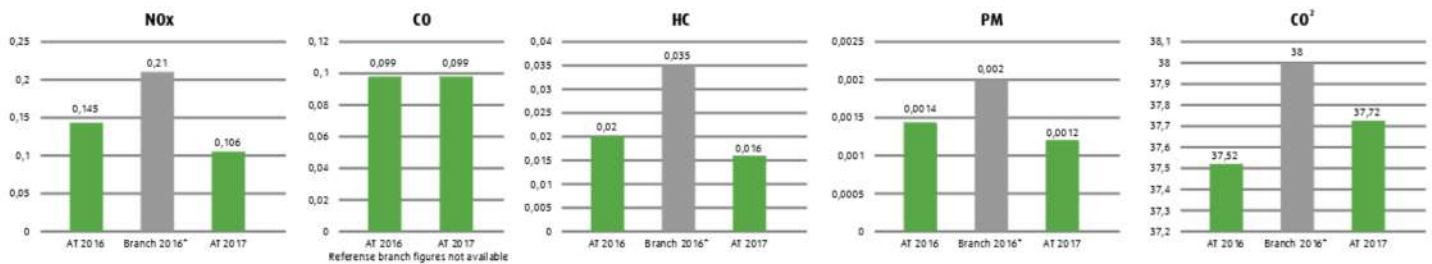

Our goal is to transport more freight in relation to our environmental impact. The company's environmental performance concerning fuel consumption is based on a correlation made between the actual fuel consumption and the number of produced tonne kilometres. The follow-up is done at the vehicle level. In this manner, a key figure that takes into account the essential factors in question regarding fuel consumption in relation to the transported amount of freight is obtained. The result encompasses both our own and contracted vehicles that drive full-time for Ahola Transport.

*Branch average according to Standard EN 16258 done by VTT TECHNICAL RESEARCH CENTRE OF FINLAND LTD. Reference figures are published at lipasto.vtt.fi

Total Emissions 2017

The emissions have been calculated at the vehicle level based on the number of litres of fuel per tonne kilometer (see above). The emissions are calculated for our own and for contracted vehicles. As a basis for calculating emissions, the Swedish Road Haulage Association's values for respective Euro-class emissions are used.

*Branch average according to Standard EN 16258 done by VTT TECHNICAL RESEARCH CENTRE OF FINLAND LTD. Reference figures are published at lipasto.vtt.fi

Euro-classes 2017

The result shows the distribution of EURO classes for all of our own and contracted vehicles in the previous year, as well as the development over the past three years.

The continuing environmental work

Ahola Transport's mission has for years been to offer more efficient, more reliable and more environmental friendly transport and logistics services. The basis of the environmental work consists of the company management's environmental targets and environmental programme where even stronger will be focus on continuously reducing its environmental impact in relation to the produced tonnekilometers.

During 2018 this will be achieved mainly by:

- Educate, encourage and follow up on all drivers' driving behavior through investment in training coaching and follow-up
- Additional investment in vehicle systems for following up on driving behavior'
- More environmental friendly engines via renewal of fleet

Business Policy

(Quality and Environmental policy)

Ahola Transport is a transport and logistics company that operates in Europe. The company plans and carries out direct transports for industry and trade. Its vision and business management emphasise added customer value and efficiency. The company's values – overall responsibility, transparency and respect for the individual – form the foundation for all of its operations.

Our objective is to:

- ▶ generate added value for customers, employees, suppliers, society and owners
- ▶ ensure competitiveness and profitability in the management of goods flows and implementation of transports
- ▶ create and maintain a safe and comfortable working environment for our staff and cooperation partners, as well as to actively participate in the development of a secure operating environment
- ▶ be a player that takes environmental impact into consideration in all of its operations

We will achieve this by:

- ▶ conducting an ongoing dialogue with our customers in order to enhance our understanding of their needs
- ▶ developing and adapting new logistics solutions related to our work methods, transport fleet and IT
- ▶ continuing to enhance the "Ahola way to work" by focusing on value-creating processes, eliminating waste and involving all employees in our improvement work
- ▶ continuing to carry out work atmosphere and job satisfaction surveys and devising programmes that continuously improve the working environment, as well as raising road safety in our operations
- ▶ investing in development, training and competence in the fields that are especially critical to the environment and quality, as well as encouraging road-users and cooperation partners to actively participate in these activities
- ▶ preventing pollution, complying with applicable environmental legislation and other requirements and continuously improving the company's environmental and quality process
- ▶ setting up clear targets and defining indicators for the focal areas listed above

Hans Ahola
CEO
